

Amazon India Sales Performance Report

Prepared by: Senior Data Analyst | Status: Corporate Ready

1. EXECUTIVE SUMMARY

This report provides an executive-level performance evaluation of Amazon India sales transactions. Through data processing, categorization standardizations, and cost-margin modeling, we have evaluated business metrics spanning Sales volume, Profitability, Customer Behavior, and Location trends.

KPI Indicator	Value	Performance Status
Total Sales (Revenue)	\$91,559,101.73	Target Exceeded
Total Net Profit	\$11,122,316.29	Stable Margin
Total Order Transactions	100,000	High Volume
Average Order Value (AOV)	\$915.59	Healthy Transaction Size
Average Profit per Order	\$111.22	Profitable Core
Net Profit Margin	12.15%	12.15% Margin

2. REGIONAL PERFORMANCE

Geographic analysis shows that the highest sales revenue was generated by the State of TX with a total of \$22,795,285.65 in revenue. Conversely, the lowest revenue state was AZ generating \$4,494,034.76. Out of the 13 U.S. states analyzed, mid-tier states like Colorado (CO), North Carolina (NC), and California (CA) demonstrate strong customer purchase rates.

3. PRODUCT CATEGORY ANALYSIS

Category	Revenue	Profit Contribution
Electronics	\$47,622,055.22	\$3,570,214.30
Home & Kitchen	\$18,436,563.70	\$2,294,307.55
Clothing	\$12,702,770.49	\$2,223,070.38
Toys & Games	\$5,535,113.45	\$1,241,687.16
Sports & Outdoors	\$3,732,511.34	\$649,658.00
Books	\$3,530,087.53	\$1,143,378.89

4. KEY ANSWERS TO BUSINESS QUESTIONS

- Total Sales & Profit: Gross sales reached \$91,559,101.73 with a net profit of \$11,122,316.29.
- Average Order Value: The AOV was calculated to be \$915.59.
- Highest & Lowest Sales States: Highest was TX (\$22,795,285.65), Lowest was AZ (\$4,494,034.76).
- Best Performing Category: Electronics generated the highest revenue of \$47,622,055.22.
- Preferred Payment Method: Credit Card led transactions with 35,038 orders.
- Low Margin Category Warnings: Electronics has the lowest base profit margin (15%). When discounts exceed 15%,

those items make a loss.

5. STRATEGIC BUSINESS RECOMMENDATIONS

1. Restrict Discounts on Electronics: Since Electronics carries a thin 15% base margin, discount promotions should be capped at 10% to prevent loss-making transactions. At 20% or 30% discounts, we lose money.
2. Launch CRM Loyalty Campaigns: There are 14483 High-Value Loyalists in the database. Engage them with tier rewards to secure high AOV transactions.
3. Localized Marketing in Low-Sales States: Run targeted digital ads in bottom states (like AZ, FL, OH) to capture latent market share.
